26" Wheelchair

**BARIWC28**  
28" Wheelchair

**BARIWC30**  
30" Wheelchair

The **Bariatric Heavy Duty - Dual Axle Wheelchairs** is a carbon steel framed chair that is specially designed for bariatric patients. The dual axle, a standard on this wheelchair, makes transition of the seat to hemi-level easy. In addition, this wheelchair boasts double embossed vinyl upholstery on both the seat and backrest, as well as has special urethane tires mounted onto the wheels, for low maintenance care.

This Heavy Duty Dual Axle Bariatric Wheelchair is an excellent choice for safe, effective bariatric patient transport. The wheelchair is specially designed for strength, durability and easy cleaning and maintenance.

### Key Product Features

- Commonly used in the post surgical treatments (skin flaps and skin grafts) .
- Thousands of Micro-sphere (beads) are forced into motion through a high powered blower creating a fluid like surface for pressure re-distribution therapy.
- High air flow/air loss to prevent skin maceration.
- Slant wedge head section, inflates to allow for head elevation for improved respiration.
- Waterproof, vapor permeable top cover.
- Air fluidized (bead-bed) technology.
