

6" Therapeutic Basic Foam Mattress

AME Basic Foam Mattress is designed to aid in pressure ulcer prevention in the home-care setting. It is cut from a single layer of high-quality, combustion-modified foam in a fluid-proof, nylon and vinyl cover. The cross-cut top surface is segmented in three distinct zones. Folded and boxed to save freight and storage. Primarily used in aggressive treatment of pressure ulcers. Weight capacity: 350lbs. This item cannot be returned or exchanged once they are opened due to hygienic reasons.

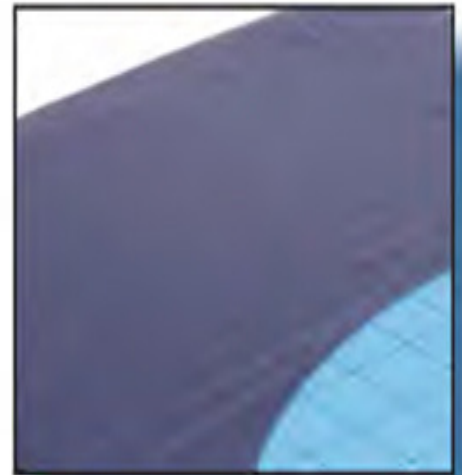

Three-tier, zoned design and all-new features makes it our finest offering.

Cross-cut top surface creates 800 individual cells in 3 zones for enhanced immersion and pressure redistribution.

Fluid-proof, wipe-clean coated nylon cover, with hidden bottom zipper for easier, more through cleaning.

Specifically designed for the needs of the at-home patient at risk for skin breakdown. This foam mattress is cut from a single 5" layer of high-quality foam in a fluid resistant, wipe-clean nylon and vinyl cover. Folded and boxed for convenient shipping, storage, and delivery.

- 1. Cover** - The bacteriostatic top fabric is fire resistant, fluidproof, tear resistant, cleanable, and replaceable. The pleated design allows full integration with the mattress's Geo-Matt style shear-relieving surface while minimizing hammocking.
- 2. Cross-cut foam top** - The cross-cut cells individually conform to the patient's curves to assist in pressure redistribution.
- 3. Core** - High-density, open-cell combustion modified foam for consistent performance
