

# BARIBED 600 BOY

## BED BARIBED 600 BOY

The Baribed 600 BOY is the perfect fit in a Home or clinical setting. This Bed Model is fully electric with a 750 lb weight capacity. As it is difficult for someone of large proportions to feel secure and comfortable in a standard size bed, Big Boyz has developed these beds to provide stability and quality of life for the large size person.

The Baribed 600 BOY bed features smooth and quiet Linak™ motors which allow for dynamic movement without disturbing a partner or surrounding residents. The foot section does not pitch down, but plateaus to reduce edema of lower extremities. All electronics are completely enclosed, fully grounded with hospital grade 3 prong heavy duty plug and cord. Electronics and motors are UL listed, 115 volts. Remote features 6 button control for all functions, is low voltage, and has a high impact resistant case. Optional bed mounted trapeze, heavy duty side rails, and integrated digital scale are also available.
