

PATIENT LIFT SCALE

PATIENT LIFT SCALE

This patient scale can be used with Jasmine lifts. It comes with digital display to accurately and easily weigh patients during daily transfers.

KEY PRODUCT FEATURES

- Air fluidized (bead-bed) technology.
- Commonly used in the post surgical treatments (skin flaps and skin grafts) .
- Thousands of Micro-sphere (beads) are forced into motion through a high powered blower creating a fluid like surface for pressure re-distribution therapy.
- High air flow/air loss to prevent skin maceration.
- Slant wedge head section, inflates to allow for head elevation for improved respiration.
- Waterproof, vapor permeable top cover.
